Characters used for Classification are:—

*⩓1 Iron vessels built with thicker plating than Rules *now* require.

⩓1 ⩓1 ⩓1 Iron Ships built according to Rules in force between 1864 & 1871.

A1 Iron vessels built for a special purpose.

100A1 95A1 / 90A1 85A1 / 80A1 75A1 } Ships built of Iron or Steel according to the Rules for Iron ships in force since 1869.

A 1 A 1—Æ 1 Wood or Composite Ships.

The figure 1 affixed to a character signifies that the vessel is well and sufficiently equipped; a line after A (thus, A—) that the equipment is deficient from that required by the Rules.

A ring over the figure 1 (thus, ⓵) indicates defects in the masts or rigging of a Sailing ship imperilling the vessel's safety.

A *red* ring over the figure 1 (thus, ⓵) indicates defects in the engines and boilers of a steam ship imperilling the vessel's safety.

Classification of Underwriters' Registry.

A✻ A✻ Iron or Steel Vessels built in excess of Rules and of extra quality of Iron.

A1* A1* A1 A1 A A Characters of Iron, Steel, or Composite Vessels built according to the Rules.

Vessels classed in Red have been built under inspection of Surveyors to Liverpool Registry.

The 12th, 13th, & 14th Cols. left blank indicate Vessels never Classed.

In Column 13 three dots ... indicate that the Vessel had a Class at one time, but it has been withdrawn at Owner's request.

In the same Column Lv signifies the classification of the Underwriters' Registry, and the letters *a*, *b*, *c*, &c., indicate the letters and equipment numbers in Table No. 22.

In Column 14 a black line with date under it (thus, $\overline{3,55}$) indicates that, at that date, Vessel, from reported defects, was not entitled to a Character in the Register Bk.; red line with date (thus, $\overline{3,85}$), indicates that Class was withdrawn from non-compliance, at that date, with Society's Rules.

A date in 14th Column, without character, indicates that the Class has expired, or been withdrawn from absence of Survey, or non-payment of fees.

In Columns 1 and 13 the ✠ signifies that the vessel was built under Special Survey.

LMC.—Machinery certified by the Engineer-Surveyors to Lloyd's Register.

B&MS.—Boilers and Machinery Surveyed and reported to be satisfactory by the Engineer-Surveyors to Lloyd's Register.

✠ Special Survey of Machinery or Boilers during construction (thus, ✠LMC, ✠NE&B).

LA&CP & A&CP.—Anchors and Chains Proved.

SS & *ss.*—Special Survey. Rest.—Restored.

Cont.—Continued. HT.—Half-Time Survey.

KEY TO THE REGISTER.

1888—89.

KEY TO SYMBOLS OF CLASSIFICATION IN REGISTER BOOK.

CLASSIFICATION OF LLOYD'S REGISTER.

*⊕A1 ..... Character of Iron vessels built with thicker plating than the Rules *now* require.

⊕A1 ⊕A1 ⊕A1 Characters of Iron ships built according to the Rules of the Society in force between the years 1864 and 1871.

A1 ..... Without a numeral prefixed, character of Iron vessels built for a special purpose.

100A1 95A1
90A1 85A1
80A1 75A1
} Characters of ships built of Iron or Steel according to the Rules of the Society for Iron ships since 1869.

A 1 ..... Character of Wood or Composite ships of the first class well and sufficiently equipped. The figures in column 13 indicate the term of years assigned originally or on continuation on the character A.

A 1 ..... Character of ships which have passed period assigned on original Survey, or Continuation, or Restoration, and of ships, not having an original Character, which are found to be fit to carry dry and perishable goods to and from all parts of the world.

Æ 1 ..... Character of ships fit for conveyance of dry and perishable goods on short voyages, and cargoes not in their nature subject to sea damage on any voyage.

E 1 ..... Character of ships which have been found on survey fit for the conveyance of cargoes not in their nature subject to sea damage on any voyage.

1 F 2 F .... Characters assigned to Foreign Built Ships—now discontinued.

The figure 1 affixed to a character signifies that the vessel is well and sufficiently equipped. A line after the A (thus, A—) signifies that the equipment is deficient from that required by the Rules.

A ring over the figure 1, thus ①, indicates defects in the masts or rigging of a Sailing ship imperilling the vessel's safety.

A *red* ring over the figure 1, thus ① indicates defects in the engines and boilers of a steam ship imperilling the vessel's safety.

CLASSIFICATION OF THE UNDERWRITERS' REGISTRY.

A1⁂, A1⁂ ..... Characters of Iron or Steel Vessels built in excess of the Rules and of extra quality of Iron.

A1*, A1*; A1, A1; A, A Characters of Iron, Steel, or Composite Vessels built according to the Rules.

Vessels classed in Red have been built under the inspection of the Surveyors to the Liverpool Registry.

The figure 1 or 2 affixed to Symbols of Classification signifies the Character of Equipment.

The figures in the fifteenth Column represent the mean drafts corresponding to an immersion of 65, 70, 75, and 80 per cent. respectively, as assigned by the Underwriters' Registry, but these drafts do not indicate approved load lines.

All vessels are required to be surveyed periodically. The *date of Survey* only certifies to their state of efficiency *at that time*.

N.B.—In reference to the Rules above quoted, and in order to prevent the disappointment arising from Ships losing their Characters from want of survey, it is hereby intimated that the duty of giving NOTICE OF PERIODICAL SURVEYS required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

✠NE&B.	7	New Engines and Boilers built under Special Survey.
†	3	Following word *salted* signifies that the vessel's beams have *not* been salted.
5,86	14	Vessel at date mentioned, from reported defects, was not entitled to a character in Register Book.
3,86	14	Vessel's class withdrawn from non-compliance at date mentioned with the Society's Rules.
...	13	Vessel's class withdrawn at Owner's request.
— (after character)	14	Equipment of vessel deficient either in quality or quantity.
1	14	The figure 1 placed after a character signifies that the vessel is well and sufficiently equipped, as per Table No. 22.
Φ	14	A black ring over the figure 1 indicates defects in Masts or Rigging imperilling the ship's safety.
Φ	14	A red ring over the figure 1 indicates defects in Engines or Boilers of a steam ship imperilling the ship's safety.

*** Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The *Date of Survey* of a ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of survey, it is hereby intimated that the duty of giving *Notice of Periodical Surveys* required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

*** Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The *Date of Survey* of a ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of survey, it is hereby intimated that the duty of giving *Notice of Periodical Surveys* required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

*** Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The *Date of Survey* of a ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of survey, it is hereby intimated that the duty of giving *Notice of Periodical Surveys* required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

*** Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The *Date of Survey* of a ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of survey, it is hereby intimated that the duty of giving *Notice of Periodical Surveys* required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

*** **Additional Ships are inserted in the Supplement at the end of the Register.**

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The *Date of Survey* of a ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of survey, it is hereby intimated that the duty of giving *Notice of Periodical Surveys* required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

LIST OF OWNERS OF SHIPS

RECORDED IN THE REGISTER BOOK.

1st *JULY*, 1888.

This List consists chiefly of the Names of Managing Owners. It therefore does not include the names of some large Owners of Shipping Property, or form a true indication of the extent to which others are interested in Shipping.

The following example illustrates the method by which the additional draught of water to which a vessel should be laden in water, partly salt, may be determined—

A flush deck vessel of 20 feet moulded depth sails from Aberdeen Harbour. To what extent should she be laden beyond the load line disc?

On referring to page 6 of the Freeboard Tables, it will be seen that this vessel should be laden deeper in *fresh* water than in *salt* to the extent of 4 inches. Also a cubic foot of fresh water weighs 1,000 ounces, while a cubic foot of the densest sea water on the British Coast is found to weigh 1,025 ounces, the difference in weight being 25 ounces. The water in Aberdeen Harbour weighs 1,015 ounces per cubic foot, or 10 ounces less than salt water, and as for a difference of 25 ounces in weight per cubic foot the increased immersion is 4 inches, it will be seen that the increased draught of water with which this vessel should leave Aberdeen Harbour is $\frac{10}{25}$ths of 4 inches, or about 1½ inches.

The following EXTRACTS from the

"INSTRUCTIONS TO LLOYD'S AGENTS"

Have been printed by the Committee of Lloyd's for the information of

HER MAJESTY'S CONSULS AND REPRESENTATIVES, COMMANDERS OF VESSELS, AND OTHERS.

In dealing with the following instructions it is essential that Lloyd's Agent should understand that, according to English Law the master of a vessel has, as Agent of the shipowner, control over both ship and cargo, and is responsible for both. Nothing less than a special power can take away this control over the property confided to his charge; but the master can appoint an Agent, and it is presumed that he will, on behalf of the assured or their representatives, readily avail himself of the assistance of an Agent who is specially appointed by Lloyd's, and whose co-operation will facilitate the settlement of loss or average with the underwriters.

In every act of interference, whether by advice or otherwise, the Agent is not to be considered as the representative of the underwriters upon any particular policy, except when he is specially instructed by such underwriters to that effect, but rather as a person whose duty it is, from the nature of his appointment, to protect underwriters from fraud, negligence, or mismanagement in the mode of treating property in peril or under average.

Telegraphic.—The special attention of the Agent is called to the necessity of telegraphing any report of the loss of a vessel or a casualty at once, and direct to Lloyd's. The Committee desire to impress very strongly the inconvenience and loss that may arise from a casualty not being reported at once. Where there is no telegraph the news should be transmitted by the quickest method.

War.—In the event of War, actual or impending, the Agent will at once telegraph the movements of all men-of-war and privateers likely to affect the interest of underwriters.

Shipping Lists.—The Agent will furnish, on the forms supplied by the Secretary, and in accordance with the instructions received from him from time to time, prompt and regular advices of the arrival, sailing, and speaking of vessels. He should also send the names of vessels arriving with damage, or having damaged goods on board which have been surveyed under his superintendence; and the names of such vessels with damaged goods as have not been surveyed under his superintendence, and the reasons that may have prevented him from attending the survey of the whole or any part of the damaged goods in each cargo. Supplies of shipping-forms and envelopes can be had upon application to the Secretary of Lloyd's.

General Intelligence.—In addition to the above, the Agent is requested to keep the Committee informed on all points that he may consider of importance to underwriters.

The Agent is requested to keep the Committee informed upon all matters that he may consider of importance to Lloyd's, relating to claims, the over-loading of ships, or any other subject. He is also requested to furnish information with reference to any misconduct of masters of vessels.

The Agent should report when any vessel sails or arrives with deck cargo, or when she appears improperly laden for the voyage.

Abandonment.—In no case is the Agent to accept an abandonment of either ship or cargo as the representative of the underwriters; he must in all cases leave the persons who abandon to act upon their own responsibility.

Total Loss.—In case of shipwreck, the Agent will take charge of the property in the absence of the master or owner of the vessel or goods, or any of their representatives or any legal authority, and he will make such arrangements for its protection and preservation as he may consider expedient. He will also give immediate advice of the circumstances to the assured, and follow their instructions in all cases where he can obtain them.

Surveyors.—Lloyd's Agent, if called upon to survey a ship, shall in all cases employ the Surveyor to Lloyd's Register of British and Foreign Shipping, if such an officer is stationed at or near the port; failing him, he will select the most competent person available, and he will take care that the Report of the Surveyor so selected shall be made on the same form as that attached to these Instructions.

Attendance of Master.—All surveys should be attended by the master of the vessel, who should also sign the certificate of survey. In case the master refuses to attend, or is prevented from attending, the Agent will note the fact on the certificate, and the reason of the master's absence.

Bottomry.—Particulars of Bottomry and Respondentia Bonds should in all cases be reported to the Committee. The raising of necessary funds by these means should not be resorted to unless credit cannot otherwise be obtained, and the owner should in all cases be previously communicated with, either by letter or by telegraph. The sale of vessels or cargoes at ports of arrival under these bonds should also be reported.

Auctions.—In cases where combination amongst buyers is likely to defeat the integrity of a public sale, the Agent should see that sealed tenders are advertised for, if such a course can be legally pursued.

Auctioneers.—With a view to prevent frauds upon underwriters at public sales, the Agent should endeavour, whenever a sale is unavoidably necessary, to have a voice in the appointment of the auctioneer, and he should see that due publicity of the sale is given in each case.

Stranding.—When a vessel is in distress, or on shore within the limits of his district, it is the duty of Lloyd's Agent to offer his services to the master.

Condemnation.—When it is proposed to condemn as unseaworthy a vessel that has sustained damage, the Agent is to use every means in his power to prevent such condemnation, unless it is evident that the vessel can only be repaired as a seaworthy ship at a cost exceeding her value after such repairs; but it is to be borne in mind that the cost of complete reinstatement as a ship of the same class and condition as before the accident, and capable of carrying on her original cargo, is not the test of the propriety of a condemnation; nor is it necessary that the repairs shall be done at the port of distress.

If repairs at the port of distress would exceed the value of the vessel, but she can either with or without partial or temporary repairs, be safely sent home, or to some other repairing port, and there repaired at a total expense not exceeding her value when repaired, it is the duty of the master to take that course.

The principle laid down in the English Law Courts is that a vessel can only be considered a total loss when to repair her as a useful ship of any sort would be a waste of money.

In case a vessel cannot in any way be made seaworthy except at a cost exceeding her value when so repaired, and her condemnation therefore becomes unavoidable, it is the duty of the Agent to investigate carefully and to distinguish whether such condemnation is caused by perils of the sea or by any natural defect or decay.

Surveyors and Repairs.—In the event of repairs being necessary to enable a ship to proceed on her voyage, the Agent will see that properly qualified men are appointed surveyors.

It is necessary that the surveyors should distinguish as far as possible in their survey and estimates between the damage sustained during the voyage in which the vessel is actually engaged and the damages or defects existing prior thereto, and which are chargeable to the owners.

The surveyors should also in every case be requested to state in their survey—

1. The probable cost of complete repair at the port of distress, so as to enable the ship to carry on her cargo.
2. If she cannot be repaired there within her value, they should state whether, by means of partial or temporary repair, she can be made fit to proceed home or to another port for repairs, and the probable total cost of temporary and permanent repairs if such a course is adopted. Also whether she can carry any and what cargo while proceeding for repairs.
3. If she cannot, either by repairing at the port of distress, or elsewhere, be put into the same condition as before the casualty at a cost within her value, they should state whether she can, nevertheless, by means of less extensive repairs, be made seaworthy, and fit to carry cargoes of any and what description, at a cost less than her value when so repaired, and they should give an estimate of the cost of repairs of this nature.

Instructions to report on these heads should be included in the document appointing the surveyors.

Documents.—The necessary documents in cases of claim against the underwriters on the ship are :—

1. The Protest, which should be compared with the Log Book and certified by the Agent, who should report any discrepancies that may be discovered between them.
2. Surveys, describing distinctly the cause of damage, and containing particulars mentioned in the paragraph headed "Surveyors and Repairs."
3. General account of disbursements.
4. Vouchers or receipted bills included in the general account, and discount or deduction of any sort, when allowed.
5. Rate of Exchange.
6. The Bottomry Bond (when there is one).
7. The value of the ship and the certificate, according to Form B in the Schedule.

Survey.—Lloyd's Agent, if called on by the consignees of a cargo to certify damage, will only act as a surveyor when his own experience of the class of goods to be surveyed enables him to pronounce an accurate opinion. But when he does not act himself, he will appoint properly qualified surveyors, whose signatures shall be authenticated by Lloyd's Agent. Care should be taken that the survey is conducted in accordance with the following general instructions :—

1. When notice of damage is given before cargo is discharged, a special survey should be held on the hatches of the vessel, and particularly with reference to the stowage and dunnage.
2. Damage by sea water during the voyage should be carefully distinguished from damage arising from other causes, as, for example, from bad stowage or packing, vermin, pilfering, inherent causes, or from the goods having been exposed to rain or damp before shipping or after discharging.

The Agent should personally satisfy himself that these instructions are carried out.

Survey on Landing.—The survey of damage should take place as soon as the goods are landed, and with this object the Agent should immediately offer his services to the consignee. In the event of any delay taking place before the Agent's services are called in, the Agent should not refuse a survey, but should grant a certificate, with the date of the arrival of the vessel, and the date and place of survey prominently noted on it, and the Agent should state if any unavoidable cause has prevented an earlier survey being held.

Sound to be Separated from Damaged.—The Agent is to see that the sound portions of each package are separated from the damaged, and he will particularise the quantity of each in his certificate. In the event of the separation of the sound goods from the damaged not being assented to by the consignees, the Agent will notify their objections on his certificate.

Goods landed in Craft.—In all ports where it is necessary to discharge goods into lighters or craft, the Agent is required to ascertain whether the person in charge of such lighter or craft has demanded of the master or mate of the vessel discharging, a certificate, or himself given a receipt, expressing any apparent damage or defects in the goods delivered over to him; and the Agent is to make a note of the same upon his survey.

Deck Loads.—The Agent will ascertain and notify whether any and what goods were laden on deck.

Sale at an Intermediate Port.—In the case of a vessel putting into an intermediate port, the Agent should protest against the sale of any part of the cargo unless absolutely necessary from its perishable condition.

In the case of a vessel being wrecked short of its destination, the Agent will offer to co-operate with the master or other representatives of the assured in procuring a conveyance for the cargo to its original destination in the best and most expeditious manner.

Sale to take place in Reasonable Time.—The sale should take place within a reasonable time from the period of landing, and the usual certificate of sound value should give the market value of the goods at the date of sale.

Exaggerated Valuations.—Care should be taken to guard against exaggerated valuations of sound goods; and if part of the goods arrive in a sound state, and are sold, a certified copy of the sale of such sound part should always be furnished.

Compromise.—The Agent may agree to an allowance being made to the consignees of goods damaged by sea water where the expenses for notarial documents, advertising, and other charges attendant upon sale by auction, would be disproportionate to the damage sustained and to the probable advantages to be gained by competition; but when the Agent exercises this power, he is always to append to his certificate of compromise that it is subject to the conditions of the policy of insurance on the goods in question, together with a certificate of the sound value of the goods.

The extent to which the above power may be exercised must be left to the discretion of the Agent, for whose guidance, however, it may be mentioned that, save under exceptional circumstances, which should be explained in the certificate, £30 is the limit of the aggregate allowances that should be made on any one consignment without obtaining the consent of the underwriters to dispense with public sale. Where the Agent has reason to fear a combination among the buyers at an auction, and therefore recommends a compromise of a larger amount than the above, and in all cases of doubt, he should communicate by telegraph with the Committee, who will at once endeavour to obtain specific instructions from the underwriters interested.

Documents.—The documents required by the underwriter for the adjustment of average on goods damaged by sea water are as follows:—

1. The Protest, which should be compared with the Log Book and certified by the Agent, who should report any discrepancies that may be discovered between them.
2. Survey on board and certificate of stowage.
3. Survey on goods landed, stating clearly cause and nature of damage; if the damage does not arise from sea water, the same should be certified, as well as its probable cause. The survey should also state the mode in which the goods were packed; and if in tin or zinc, whether properly soldered; and in cases of claim for leakage of liquids, the condition of the packages on landing, and whether the same were of good construction, and fit for the voyage.
4. Custom House Certificate of rebate of duties on account of damage.
5. Certificate of the market price or value of the goods at the time of sale for cash if they had arrived free from damage, or certificate of the actual sale of the sound, which is always to be preferred.

6. Account sales of damaged goods duly certified and showing whether sold in bond or duty paid, and for cash or credit; and if for credit, state what deduction for discount should be made to reduce the proceeds of sales to cash.
7. The Agent to certify on his certificate which of the charges described in the documents are extra in consequence of the damage, and if sold by auction whether any and what portion of the auctioneer's commission is returned, also if any and what charges are paid by the buyers of the goods.
8. In cases of damage to articles usually sold by weight, it is desirable, where practicable, to forward a certificate of the weight of the sea damaged portion, also the total gross and net landing weight of the sound portion of each mark separately.

The Agent must on no account certify as to the correctness or incorrectness of accounts, nor as to whether they are fair and reasonable, but must confine his remarks to stating whether the persons who prefer the charges are worthy of confidence or otherwise.

Capture of Neutral Goods in Enemies' Vessels.—If the country in which the Agent resides is at war with any other country, and a captured vessel of that other country should be brought into any port within the Agent's district, he should watch the proceedings of the Prize Court, and endeavour to prevent any sale of the cargo either before or after the condemnation of the vessel as lawful prize.

In reporting the circumstance to Lloyd's, he should point out particularly what steps it will be necessary for the owners of the goods to take, whether in any local Marine Court or in the Central Court of Prize, to obtain possession of their goods, and should specify the documents which the Court will require for establishing the ownership of the goods, and for proving that the owners belong to a neutral country.

Property in Peril.—When a vessel is in distress or on shore within the limits of his district, it is the duty of Lloyd's Agent to make such arrangements with the master for recovering, saving, or preserving the property as may be deemed expedient. It is repeated that the Agent, by this instruction, is not empowered to accept an abandonment of either ship or cargo.

Salvage.—In all cases where salvage or remuneration is claimed for assistance rendered to vessels, the Agent should attend the meetings of commissioners, magistrates, or other persons legally authorised to determine the amount, in order to rebut, by the evidence of the master and crew, any exaggerated statements on the part of the salvors.

Salvage for Recapture.—It has frequently happened, when a vessel has been captured and recaptured, that instead of the salvage being paid, and the vessel proceeding to her port of destination, both vessel and cargo have been sold for the payment of salvage, and the loss of the underwriters been thereby much increased. It is therefore incumbent on the Agent to endeavour, upon every occasion, to take such steps as appear requisite for an adjustment of the salvage, so that the vessel may proceed with her cargo to her port of destination.

Salvage Proceeds.—In the event of salvage proceeds of either ship or cargo passing into the hands of the Agent, he is at once, if there is no owner or agent of the owner on the spot to receive them, to remit the same, in bank bills if possible, together with the documents required for the division of the amount, to the Committee of Lloyd's, who will take the necessary steps to distribute the proceeds amongst the persons interested.

Average Statements.—The Agent is not to make up or sign any statement of average, either general or particular, but should leave any claim to be adjusted between the underwriters and the assured upon the documents furnished.

A* A* Iron or Steel Vessels built in excess of Rules and of extra quality of Iron.

A1* A1* A1 A1 A A Characters of Iron, Steel, or Composite Vessels built according to the Rules.

Vessels classed in Red have been built under inspection of Surveyors to Liverpool Registry.

The 12th, 13th, & 14th Cols. left blank indicate Vessels never Classed.

In Column 13 three dots ... indicate that the Vessel had a Class at one time, but it has been withdrawn at Owner's request.

In the same Column Lv signifies the classification of the Underwriters' Registry, and the letters *a*, *b*, *c*, &c., indicate the letters and equipment numbers in Table No. 22.

In Column 14 a black line with date under it (thus, 3.85) indicates that, at that date, Vessel, from reported defects, was not entitled to a Character in the Register Bk.; red line with date (thus, 3.85), indicates that Class was withdrawn from non-compliance, at that date, with Society's Rules.

A date in 14th Column, without character, indicates that the Class has expired, or been withdrawn from absence of Survey, or non-payment of fees.

In Columns 1 and 13 the ✠ signifies that the vessel was built under Special Survey.

LMC.—Machinery certified by the Engineer-Surveyors to Lloyd's Register.
